**POLLEN RECEPTIVE**

**POLLEN SHEDDING**

- These dates were compiled from various geographical areas. For your area, allow climate zones to influence actual dates of pollination and yearly climatic changes.

Protandrous (1) - Pollen sheds prior to Stigma Receptivity.

Protogynous (2) - Stigma receptive prior to pollen shedding.

PICTURE TAGS ARE FURNISHED FOR ALL TREES AT NO EXTRA CHARGE.

## Papershell Pecan Varieties

**BURKETT** - Originated at Clyde, Texas; one of the best of the Western list. It also does well on high ground in East Texas. Medium to large size, fills well, good flavor, and prolific. 55 percent meat.

**CADDO** - Regular producer with good yields, scab resistant. Protandrous.

**CANDY** - Medium sized nuts, early ripening, consistent and heavy bearer. Protogynous.

**CAPE FEAR** - Bears heavy crops at an early age. Scab resistant. 55 to 60 nuts per pound. Best for Southeast States. Protandrous.

**CHEYENNE** - Nuts are medium size, 55 to 60 to a pound, 57-61% kernel. Bears heavy and early. Does well in most regions. Protandrous.

**CHOCTAW** - This is a cross between Success and Mahan. Nut is high in oil content, about 60% kernel, thin hull, large and attractive. Well adapted to most pecan growing areas. Protogynous.

**CREEK** - Very productive cultivar with good scab resistance. It is a smaller tree and suitable to higher density plantings.

**DESIRABLE** - One of the larger pecans, excellent cracker, bears early and is a very heavy producer. Has a thinner shell than Success. Disease resistant. Protandrous.

**ELLIOTT** - Small, prolific nut of excellent quality. Scab resistant in all areas of Pecan belt. Protogynous.

**FORKERT** - 47 nuts per pound, 62% kernel. A cross between Success and Schley. Protogynous.

**JACKSON** - Outstanding pecan in size and meat (60%). High scab resistance. Self-fertile; excellent pollinator. Good for home or commercial use. Bears in 5-6 years. Excellent for Louisiana/Mississippi market. Protandrous.

**KANZA** - High Scab resistance. 54% Kernel. Protogynous.

**KIOWA** - This Mahan-Odon cross. Nuts are large, oblong, needing 45 to 50 to make a pound. Bears early and heavy crops of excellent quality nuts. Protogynous.

**MAHAN** - Is one of the largest pecans grown. Average nuts about 2 1/2 inches long. The best variety for shade tree. Protogynous.

**MARAMEC** - Originated in Oklahoma. Large, thin shelled nut. 59% kernel. High productivity, mid-season maturity. Limited supply available. Protogynous.

**MOHAWK** - This new variety is a vigorous grower, nuts are large and full. Matures early and thin shell. Success-Mahan cross and appears to be excellent for yard plantings. Protogynous.

**MORELAND** - Is a strictly first-class pecan variety. Nuts are medium-large, oblong and very thin shell. Beautiful trees with large foliage. Very similar to Schley. Protogynous.

**OCONEE** - Large nut, 59% Kernel. Disease resistant. A cross between Schley and Barton. Protandrous.

## Papershell Pecan Varieties (Continued)

**PAWNEE** - Mohawk-Starking Hardy Giant Cross. Large nut. Early nut maturity and high Kernel Percentage. Protandrous, Mediocre Scab resistance. Protandrous.

**PEE WEE HICAN** - Also known as McAlester. Cross between Mahan & Hickory.

**PODSEDNIK** - Extra large pecan, only needing about 22 nuts to the pound. Protogynous.

**STUART** - Comes nearer being suited to all sections of the country and all soils than any other variety. A large nut, fills out well and a heavy bearer, also a fast growing variety. Protogynous.

**SUMNER** - Early bearing, large, good quality nuts. Suited for close space planting. Protogynous.

**WESTERN SCHLEY** - Is similar to Eastern Schley but thrives better in drier climate and higher altitudes of the West. Protandrous.

**WICHITA** - Mahan-Halbert cross, medium size nuts and heavy, dark green foliage. Heavy bearer at an early age. Recommended for Western areas. Protogynous.

## Packaged Papershell Pecan Trees With Picture Label On Each Tree

Our individually wrapped trees will be packed in a very colorful plastic bag with a picture of the variety and its description placed on a tag in the top of the trees. Along with this information will be planting instructions. These trees will have eye appeal and should move very rapidly on to the retail trade.
